

# The Wolf Ecosystem.

Seven phases. One pack. Building the future of decentralized finance — one product at a time. Operator-funded since January 2023.

3 of 7 phases live

## DeFi was supposed to be different.

In 2020 the promise was clear: open infrastructure, transparent fees, no permission needed to participate. By 2025 that promise had been re-wrapped in 100-slide pitch decks, governance theater, locked-up tokens, and yields that disappear the moment you read the fine print.

We don't think the original idea was wrong. We think the people building it got distracted. So we're building what DeFi should have been: a small set of tools that do exactly what they say, charge fees you can see, and never gate basic features behind a token you have to buy first.

**The Wolf Ecosystem is independent infrastructure for builders, traders and curious users. Operator-funded. Operator-led. Built to still work in 2046.**

## The pack ships in seven waves.

Three live and serving real users today (Dex, Trade, AI). Four under construction (Wallet, Token, Chain, Chat). Each one is its own product. Together they're the family.

PHASE 01 LIVE wolfsofdex.com

### WolfsOfDex

*Cross-chain swap aggregator. Best prices across 90+ networks. Non-custodial. No KYC.*

<b>90+</b> chains	<b>350+</b> DEXs	<b>25+</b> bridges	<b>3%</b> builder fee
----------------------	---------------------	-----------------------	--------------------------

PHASE 02

LIVE

Q3 2026 · public scale-up · wolfsoftrade.com

## WolfsOfTrade

Perpetual futures DEX. Up to 50x leverage. 230+ markets. Sub-second execution on the deepest on-chain order book.

50x

03 · OPERATIONS LAYER

## The pack also needs marketing infra.

Not a phase. The brand presence behind every product launch.

04 · HOW WE BUILD

# Five principles we don't break.

---

01

02

### **Honest fees, no hidden math.**

Every fee visible in the UI before you confirm. No "best price" with secret routing markups.

---

03

### **Real utility, not hype.**

If a feature doesn't make a real user's day easier, we don't ship it. We don't ship features so we can put them on a roadmap.

---

05

### **Operator-led. No VCs.**

Self-funded since January 2023. No external capital means no external roadmap pressure. We ship when it's ready.

**No token. No ICO. No private sale. Yet.** This document is not a security offering. The Wolf Ecosystem is operator-funded infrastructure. We build, we ship, and we earn from honest, visible builder fees on the products that already work. *\$WOLF (Phase 4, 2027)* will arrive on a fair launch with voting rights and revenue share — when the time is right and the rest of the pack is mature. Not before.

### **Direct UX, no bloat.**

Three clicks to swap. Four to open a perp. No onboarding tour, no airdrop modal.

---

04

### **Build for the long term.**

What we make today should still work in 2046. No proprietary lock-ins, no chain we'll abandon in two years.

---

### **Find the pack — six platforms, one brand**
